CVap A WINSTON INDUSTRIES INNOVATION HOLD & SERVE DRAWERS

QUICK, EASY ACCESS TO HOT, FRESH FOODS

Do you need to easily access popular menu items during busy serving periods? Do you want to serve your customers hot, fresh foods – quickly?

With CVap® Holding Drawers, you can serve dinner rolls that taste just baked, tortilla chips that are warm and crisp, or even muffins that are moist and delicious – even though they've been holding for hours.

Whether you're serving crisp foods or moist foods, you will be able to deliver the consistency and quality your customers demand, as soon as they ask for it. There is no limit to the variety of items that can be heated or held in CVap Drawers!

And there are no worries about the safety and quality of what you are serving. Foods are always held at the correct serving temperatures and textures because CVap equipment utilizes Controlled Vapor Technology. The exclusive dual heat system creates a delicate vapor blanket which prevents moisture loss or saturation. Moist foods stay moist and crisp foods stay crisp – for hours.

Temperatures will remain steady throughout service regardless of usage because CVap Drawers recover quickly from frequent openings.

Select from a variety of different sizes and configurations, all designed to fit conveniently underneath or on top of serving counters for quick and easy access. Your staff will be able to grab the hot, fresh food they need without disrupting the line.

Reduce some of the stress that comes with peak serving times. CVap Holding Drawers smooth the way to increased productivity and customer satisfaction.
