

UNIC ESPRESSO EQUIPMENT INSTALLATION TERMS

The Installation includes limited installation¹, equipment inspection², equipment start-up³, and the introductory overview of the basic functions of the equipment⁴ at a single location 35 miles or less from a UNIC™ Authorized Service Provider.

¹Limited Installation: plug into required existing power outlet, water connection, and drain utility; all within 4' of the equipment location. Any counter or wall access holes must be in place prior to the installer's scheduled visit. **See detailed installation checklist for each model.**

²Equipment Inspection: Verify damage-free delivery of the equipment and inclusion of all standard accessories and user documents. Test that all parameters and features of the equipment are functioning as per specifications.

³Equipment Start-up: Confirm correct power input, verify incoming water quality, and level machine per specification. Verify and adjust correct temperature settings, and pump & boiler pressures. Program and calibrate drink selections & volumes per customer/coffee supplier recipe.

⁴For full operator training on how to prepare espresso-based drinks, the customer must request an education from their coffee supplier or from a coffee industry trainer.

The customer must provide the following for installation - See detailed installation checklist for each model:

1. Appropriate electrical outlet service within 4 feet of the equipment's location for electrical connection.
2. Access to cold water with a minimum of 30 psi pressure with adequate shut-off valve within 4 feet of the equipment's location for water line hook-up.
3. Adequate drain utility withing 4 feet from equipment for flexible drain hose to reach into.
4. Adequate & appropriate space to position equipment.
5. Counter and wall access holes to run power, water, and drain lines must be in place before the installation.
5. Coffee products, Milk, and Cups, for operator use, must be present for the installer to perform correct calibrations and recipe programing of the equipment.
7. Presence of operator staff during the installation to verify calibration requirements and to observe overview of basic operations.

The installation must be performed by the manufacturer's Authorized Service Agent only. The use of any other party would void the warranty, unless explicitly authorized otherwise by the manufacturer in writing.

When the site and all utilities are ready, verification and installation may be requested at:

<https://forms.bluecatreports.com/uAGFda60/electrolux-professional-espresso-machine-installation-request>

Site readiness will be verified by UNIC prior to dispatching the installer.

Additional charges (i.e. removal of old equipment, work required to reach compliance with installation requirements above, travel time outside stated radius, or other expenses outside normal installation situation) are the responsibility of the customer.
