

**GLOBE** PIZZA SOLUTIONS

# Mixers

**WE BUILD THEM LIKE THEY USED TO - ONLY BETTER.**

Speed, power, consistency and quality! What makes Globe different? Design and manufacturing. Gear transmissions that use premium alloy steel and shafts that outlast and outperform belt drive systems.

## PIZZA MIXERS

While all Globe mixers mix pizza dough, the SP62P and SP30P are specifically built for tough dough applications. The SP62P is perfect for high-volume pizza operations. With the capacity to handle up to 50 lbs. of flour and three gallons of water, this powerful, reliable product will minimize mix time and maximize dough output.

- High torque, direct-gear drive transmission can handle the most demanding mixing applications: 3 HP SP62P, 1.5 HP SP30P
- Digital controls, timer, and bowl lift (power bowl lift on SP62P)
- Heat-treated steel alloy gears and shafts
- Comes with a stainless steel bowl and spiral dough hook
- Bowl truck included with SP62P

**All Globe mixers are backed by a two-year parts and labor warranty!**

## PLANETARY MIXERS

These mixers do more than what you knead! From 5 to 80 qt. capacities, Globe offers mixers that can handle a wide variety of applications, including pizza. All mixers excluding the SP62P and SP30P include a flat beater, wire whip and dough hook. The SP62P and SP80PL offer a power bowl lift.

Globe's capacity chart can also be found online at [www.globefoodequip.com](http://www.globefoodequip.com)

\* NOTE: The maximum capacities indicated in our Mixer Capacity Chart are intended as a guideline only. Varying factors such as the type of flour, water temperature, and other conditions may require the batch to be reduced.

The mixer capacity depends on the moisture content of the dough. When mixing dough (pizza, bread, or bagels) check your Absorption Ratio percentage (AR%)! Absorption Ratio % (AR%) = water weight divided by flour weight. The capacities listed below are based on flour at room temperature and 70°F water temperature. (1 gallon of water weighs 8.33 lbs.)

### Key Symbols

- ✕ Maximum mixing time - 7 minutes.
- ◆ If high gluten flour is used, reduce the batch size by 10%.
- ◆ If using chilled flour, water below 70°F, or ice, reduce batch size by 10%.
- 2nd speed should never be used on 50% AR or lower with the exception of the SP60. The SP60 requires a 50% reduction in batch size to mix in speed 2 with 50% AR doughs.

# Slicers

When it comes to performance and great value, nothing beats Globe's G-Series Slicers. Quality construction and reliable performance combine for a lower total life-cycle cost, making Globe's G-Series the #1 selling medium duty slicer line in North America.
