

IT'S ABOUT TIME

NEW! 4-HOUR CLEANING TIMER

Globe's new patent-pending 4-Hour Cleaning Timer brings innovation to sanitation with SG13 and SG13A Slicers! From the first slice, a countdown is activated to notify the operator when it's time for regular sanitation.

Alerts appear on Globe's exclusive Clear Text Display after 3 hours 30 minutes and 3 hours 45 minutes. If the slicer isn't unplugged, cleaned and sanitized before the 4-hour mark, it will automatically shut down for cleaning. Operation can resume once the slicer has been cleaned, sanitized and plugged back in.

Get unmatched sanitation only from Globe.
