Now Available  
with 4 lb.  
5 1/2 lb. &  
8 lb. hoppers

**Fast Flow**  
TECHNOLOGY INSIDE

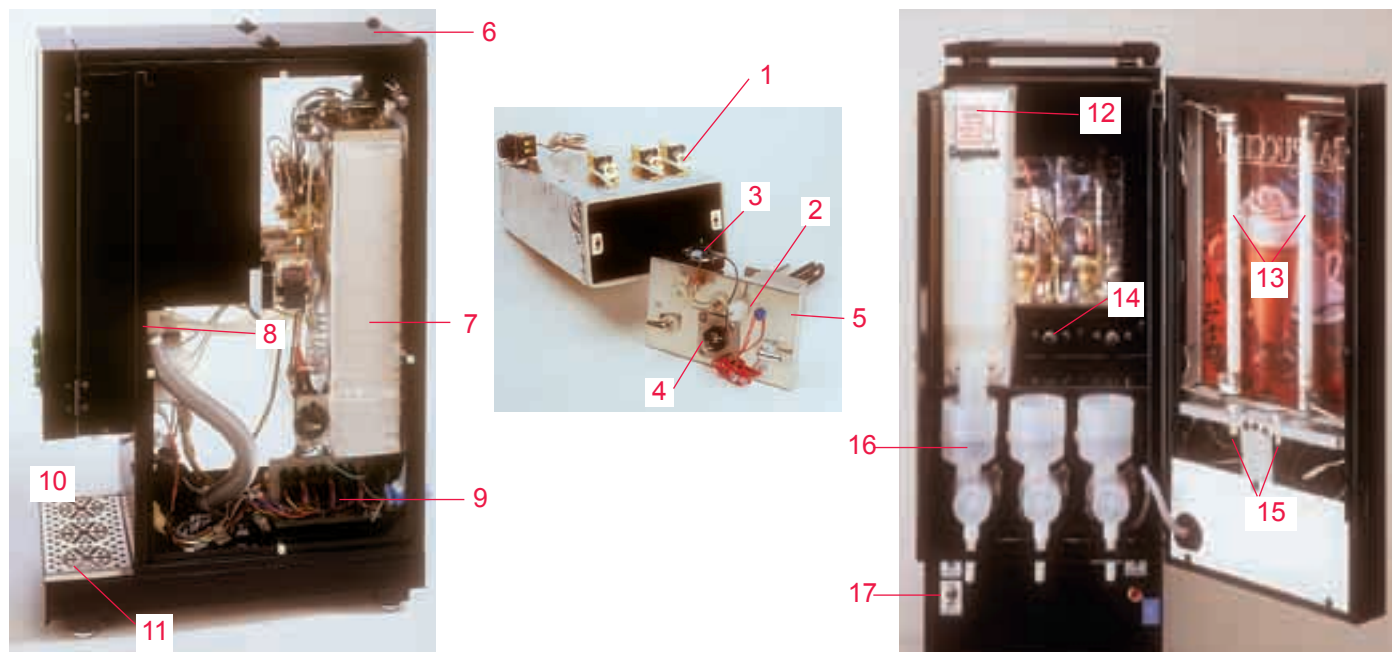

## Simply press button for rich, frothy, hot Cappuccino.

Looking for a Cappuccino Dispenser that's compact, efficient and will serve lower volume requirements – consider the "K" series of dispensers. Only Cecilware can incorporate its *New "Fast Flow"* technology as a standard feature. Choose from an array of 1-5 product hoppers, each able to hold 4, 5<sup>1</sup>/<sub>2</sub> and 8 lbs. of product per hopper. Ideal for Convenience Stores, Fast Food Restaurants, offices and virtually any location where hot beverages are sold. Cecilware offers the **Quality Dispenser** you deserve at a price you can afford. **Compare and Save!**

- **"Fast Flow" Technology** – Dispense Cappuccino at 1.3 oz. per second -vs- the standard 1 oz. per second with the same drink strength . . . that's 30% quicker. This *new* technology extends the life of major components (auger & whipper motors, dispense chambers, etc.) by 30%, speeds customers, increases profits and saves electricity.
- **Direct Drive Auger System** – Insures *perfect* hopper alignment and "silent running".
- **Vacuum Steam Removal System (VSRS)** – Insures that the Cappuccino product will remain dry which eliminates clogging, caking and bridging.
- **"Power Whip"** – Makes perfect, frothy Cappuccino consistently every time.
- **Solid Lid Construction** – Must remove hoppers to refill product. Keeps the dispenser clean and free from powder residue or buildup.
- **Eye Catching Lighted Graphics** – Bright, easily replaceable fluorescent bulbs in back of beautifully designed graphics – attracts customers' interest in Cappuccino products.
- **Product Integrity Guaranteed** – Individual product hoppers and dispense chambers prevent mixing of different products.
- **"High Tech" Look** – Combines heavy duty steel construction with a sleek, durable black enamel finish.
- **High Capacity Water Tanks** – Supply constant hot water to meet demand requirements.
- **Self Cleaning Feature** – Rinse system is touch button easy and rinses the entire whipping chamber mechanism with hot water at the end of each rinse.
- **A Service Breeze** – All components and adjustments are readily accessible for easy, in-place service. All parts requiring regular cleaning can be removed by hand.

This is.....

# “What makes Cecilware #1 in Cappuccino!!”

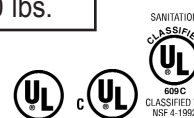

- Hi-Performance Anti-Clog Dump-Valve-** Pulls out of unique silicone fitting in sidewall of tank and disassembles easily without tools for cleaning. Silicone fittings are used for better tank longevity.
- Two safety mechanisms** to prevent overflowing of water tank.
- Hi-Limit controlled water tank heater. Prevents element burnout.
- Heating element is accessible from top of tank. No need to drain tank for replacement of element.
- Tank top is totally removable for de-liming of tank.
- “Easy Access”** side panels do not require removal of cabinet top first when doing most service operations.
- Largest water tank capacity delivers highest burst rate.
- Sealed **Vacuum System Removal System** removes excess steam. Prevents bearding, clogging of product chute and keeps electrical components moisture free.
- Power Relays are used to operate motors and controls, resulting in longer component life span.
- Large cup clearance (8½")** handles the tallest 20 oz. cups in the industry.
- Oversized **Stainless Steel Drip Tray (3" High x 15" Deep)** - No need to empty as often.
- 4, 5 ½ and 8 lb.** high capacity hoppers require refilling less often.
- Two **“Easy Access”** independent fluorescent bulbs. If one bulb fails, the other will remain lit.
- Reliable **Direct Drive Auger System** - Insures *perfect* alignment and “silent running”.
- Starters and Ballasts are easily accessible.
- Hand removable** mixing and dispense chambers for easy cleaning.
- Rinse Cycle Switch flushes and sanitizes mixing and dispense chambers.
