

MODEL AD-120W

Door Style Dishwasher

Item # _____

Standard Features

- **High temperature** sanitation to protect your ware from harmful chemicals during final rinse. Your ware will come out cleaner and dryer than conventional sanitation methods.
- **Electronic Controls** for a precise wash with 3 programmed wash cycles to handle your specific needs. **60 Racks per hour capacity.**
- Built-in **electric booster** heater that will raise the temperature to the NSF required temperature of 180°F for sanitation.
- Unique **“Hot Water Assurance”** feature which guarantees 180°F final rinse.
- **Complete counterbalanced** hood system to allow full production flow during the usage of your dishwasher. (No Channels to work around)
- **Chemical friendly** with built-in dispensers for liquid detergents and rinse. Also pre-defined electrical connectors and pre drilled tank for probes and injectors, makes it easy to install third party dispensing systems.
- **Field adjustable** straight-thru or corner design to adapt to your ever changing needs in your kitchen.

Specifier Statement

Specified unit will be a Fagor AD-120W single tank, door style, high temperature dishwasher with built-in booster heater. Features electronical controls with 3 time settings, efficient 32 amp total draw (single phase) and 19 amp total draw (3 phase), .8 gallons of water per cycle. Unit can convert from straight thru or corner design in the field. Stainless steel construction including the top and side panels. Standard with liquid detergent and liquid rinse pumps, 6” legs. 1 year labor / one year parts warranty.
