

VACMASTER® BS116

The **VACMASTER® BS116** Impulse Bag Sealer is a fully automatic electromagnetic sealer with the latest technology that allows different types of bags to be sealed quickly. It is designed to meet the demand of small to high volume food service operations. This unit has a full 16" seal bar that requires no tools for effortless installation and removal, which makes cleaning and maintenance a breeze! This sealer is designed to create a positive, secure seal on both commercial and retail pouches as well as plain poly bags.
