FPLHD265 with 3000 controller and optional marine edge and front oil disposal.

Standard Features

- Thermo-Tube frypot design
- ENERGY STAR® qualified. Eligible for energy-saving rebates.
- Low flue temperature (<550°F/287°C)
- 100-lb (50-liter) oil capacity
- 105,000 Btu/hr. (26,448 kcal/hr) (30.8 kw/hr.)
- Frying area: 18" x 18" x 5-3/4" (46 x 46 x 15 cm)
- 3000 controller
- Electronic ignition
- Wide cold zone
- Built-in filtration (batteries only)
- 8 GPM filter pump
- Drain safety switch
- Drain flush, 1-1/2" drain valve, 3" drain
- Basket rack(s)
- · Basket hanger(s) with flue deflector
- Two dual baskets
- · Stainless steel frypot, door, front and sides
- Casters

Options & Accessories

- ☐ Thermatron and CM3.5 controllers
- Basket hanger with flue deflector
- ☐ Dual basket
- Triplet basket
- Full basket
- ☐ L-shaped basket rack☐ Screen type basket rack
- 11" plate marine edge
- Front discharge with 6' wand
- ☐ Rear discharge ☐ Splash guard
- ☐ Frypot cover

Specifications

The LHD65 low flue temperature fryers are large capacity gas systems, with an 100-lb. (50-liter) oil capacity, and a cooking depth of 5-3/4" (15 cm) per frypot. These ENERGY STAR® qualified, large vat fryers are specifically designed to fry bone-in chicken and other fresh breaded products.

The built-in filtration system on batteries saves valuable floor space. An 8 GPM pump makes filtering fast, safe, and convenient, encouraging frequent filtering, which extends the useful life of oil.

The cold zone holds heavy sediment and debris away from the cooking area so that they cannot cling to fried products or contaminate the oil. The bottom of the frypot is sloped toward the front for fast, thorough draining.

The SMART4U® 3000 controller has operation management features that monitor and help control food and oil quality, oil life, and equipment performance. It has 20

programmable cook buttons and auto adjusts cook time to load size. The segmented cooking feature allows programming a cook with up to five different set temperatures and times as desired for cooking bone-in chicken.

With 105,000 Btu/hr input, exclusive thermo-tube design, and controlled flow diffusers, this high performance fryer provides maximum production, forcing energy into the oil, with less going unused up the vent. Exhaust temperatures are 550°F or less. The benefit is fast heat-up and recovery times, low idle costs, lower ambient temperatures, and low gas consumption per pound of product cooked.

This unit is shipped standard with stainless steel frypot, door, front, and sides.

HOW TO SPECIFY -- EXAMPLES

The following description will assist with ordering the features desired for this equip-

Single high-volume, low flue temperature gas fryer, 105,000 LHD65 Btu/hr, 3000 controller and casters

Battery of 2 high-volume, low FPLHD265 flue temperature gas fryers, 105,000 Btu/hr, 3000 control-

FPLHD365 - Battery of 3 high-volume, low flue temperature gas fryers, 105,000 Btu/hr with space saving under fryer filter, 3000 controllers, and casters.

Please specify gas type.

CLEARANCE INFORMATION A minimum of 24" (61.0 cm) should be provided at the front of the unit for servicing and proper operation, and 6" (15.2 cm) between the sides and rear of the fryer to any combustible material.

POWER CORDS:

On 1 and 2 battery units, 1 power cord supplied On 3 and 4 battery units, 2 power cords supplied
On 5 and 6 battery units, 3 power cords supplies
