## Designed Smart

### Bid Specifications

Mobile enclosed, field adjustable Dish Dispenser features heavy-duty stainless steel frame construction. The dispensing mechanism in APW Wyott's Lowerators® uses springs attached to a sliding support bar that rides both inside and outside the tube. This design feature prevents a stack of dishware from sticking in the down position, and releasing unexpectedly. All contact edges are protected by heavy-gauge stainless steel with black rubber perimeter bumpers. Available in heated or unheated models. Unit has 4" polyurethane swivel casters, two with brakes.

### Applications

Mobile enclosed cabinet-style Dish Dispenser utilizes Adjustube® self-leveling tubes that are field adjustable for weight. Holds and dispenses plates, saucers, or bowls. Hole cutouts in base align lower end of tubes in position to prevent movement during transit. Field adjustable for varying weight loads up to 100 lbs. per tube. Available in two and three-stack units, heated and unheated models.

## APW Wyott Design Features

- Promotes sanitary conditions.
- Provides finished appearance.
- Easy handling of dishware.
- Maximum stability and rigidity of unit.
- Dispensing tubes are removable for cleaning.

## Reliability backed by APW Wyott's Warranty

All APW Wyott Lowerators are backed by a 1-year limited warranty and a 1-year on-site labor warrant. \*

•Certified by the following agencies:
