MODULAR DROP-IN: NSF7 REFRIGERATED COLD PANS

Modular Drop-In: NSF7 Refrigerated Cold Pans

DESCRIPTION

The modular drop-in NSF7 refrigerated cold pans are designed for top-mount installation.

A full-perimeter drip edge contains spills and condensation within the stainless steel countertop area of the drop-in.

High-density polyurethane foam insulation surrounds the exterior of the well to provide most efficient performance with energy savings.

A 3" (7.6 cm) recess lowers the food pan below the work surface to minimize the impact of ambient air. The deep display well is designed to accommodate standard 12" x 20" (30.4 cm x 50.8 cm) pans up to 6" (15.2 cm) deep.

Refrigeration coils surround the exterior side walls of well for maximum cooling. Refrigerant is R134A to meet federal standards.

Cold drop-ins are best used for holding periods up to four hours. For best performance, stainless steel containers are recommended.

Modular drop-in orders cannot be canceled or returned.
