

## STANDARD SPECIFICATIONS

### CONSTRUCTION

- Welded stainless steel tank with an extra smooth peened finish ensures easy cleaning.
- Long lasting, high temperature alloy stainless steel baffles are mounted in the heat exchanger elliptical tubes to provide maximum heating and combustion efficiency.
- Elliptical heat tubes have more surface area and will provide greater heat transfer.
- Standing pilot light design provides a ready flame when heat is required.
- Stainless steel front and door, galvanized steel sides and back.
- Fully lined door that will keep outer door at a cooler temperature.

### CONTROLS

- Thermostat maintains selected temperature automatically between 200°F (93°C) and 400°F (204°C).
- Integrated gas control valve acts as a manual valve, and pilot valve, automatic pilot valve, gas filter, pressure regulator, and automatic main valve.
- Gas control valve prevents gas flow to the main burner until pilot is established. Shuts off all gas flow automatically if the pilot flame goes out.
- Temperature limit switch safely shuts off all gas flow if the fryer temperature exceeds the upper limit of 450°F (232°F).
