## Portable Micro-Flo Oil Filters

### ***Filter Your Cooking Oil without straining your budget***

**Extend cooking oil life** - with one of Dean's heavy-duty portable oil filters. Periodic use reduces oil costs and dramatically improves food flavor and consistency.

**Clean and polish your cooking oil** with Dean's special recycling process. By using filter paper and special acid-absorbing powder, the Dean portable filter removes all foreign particles from micron-sized carbon deposits to solid food particles and fatty acids.

Dean's unique process allows filtering as often as necessary. The result is contaminant-free oil, which means a greater yield of more delectable golden fried foods.

**The powerful 5 GPM pump** automatically recycles the oil and returns it to your fryer. Risk of splashing hot oil is reduced by a return hose that reaches to the bottom of the fryer. Debris is trapped in the easy-to-clean paper filter within the filter pan.

**Select the filter size you need** - Dean portable oil filters are available in capacities from 80-110 lbs. (45-62 L). For ease in filtering, all Dean filters will fit under the drain of all Dean fryers. Due to low pan height, the MF90U/80LP and MF90AU/80LP can fit under the drain of most fryers.

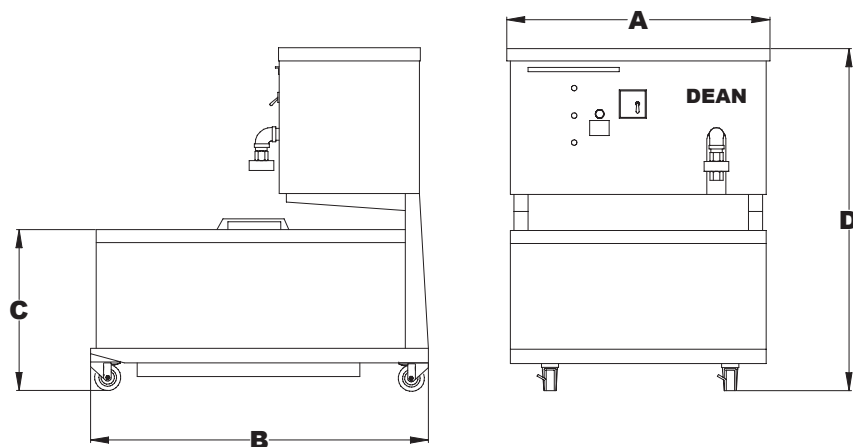

**Flexibility** - Available in gravity drain (U) or suction type/reversible pump (AU) for filtering of countertop fryers.

MF90AU/80 portable oil filter, 80 lbs. (45 L)  
max. oil capacity (shown with return hose)

# Portable Micro-Flo Oil Filters

## SPECIFICATIONS

Model	Oil Capacity	Size (cm)				Shipping lbs./cu. ft. (kg/m <sup>3</sup> )
